- **FIRST TIME** IN PLASTIC COMPLETE WITH DCC AND SOUND FROM THE FACTORY
- **LONG LASTING COMMUTER CARS** — MANY STILL IN SERVICE TODAY
- **UNMATCHED UNDERBODY AND INTERIOR DETAILS**

The Metropolitan commuter cars have long been a staple of New York City commuting. These unique railcars have earned their living plying the rails of the northern NYC suburbs, as well as, Long Island for the past 40 years.

In 1984, the Metropolitan cars were built by the now defunct Budd Company for the Metropolitan Transit Authority (Metro-North) and the Long Island Rail Road. The cars were designated M3 (LIRR) and M3A (Metro-North). Both were improvements of the original M1 and M1A designs built for both agencies in the late 1960s and early 1970s. These cars continue to haul commuters everyday on LIRR and Metro-North, albeit in reduced numbers.

FOR MORE ON THE M3 AND M3A RAILCARS, READ ABOUT THEIR HISTORY AT: RAPIDOTRAINS.COM/MASTER-CLASSES

THE BUDD M3 AND M3A RAILCAR FEATURES:

- Fully hidden underfloor drive system
- Full interior details
- Complete underbody detailing
- Two-car sets connected by a close coupling system
- Full interior lighting
- Accurately scaled from prototype drawings and field measurements
- Detail variations for both Long Island and Metro North units throughout their careers
- DC/Silent or DC/DCC/Sound options
- MoPower capacitor system for uninterrupted DCC power
- Multiple unit numbers available
- Suggested minimum radius: 22"
