## Now coming to N Scale: The BiLevel Commuter Cars by Rapido!

The BiLevel Commuter Car was originally designed in the mid-1970s at the request of the Government of Ontario (Canada) to develop a higher-capacity solution for their GO Transit commuter trains in the Greater Toronto Area. The commuter trains had grown to 10-car single-level trains during peak times and it was felt that the ideal solution was to increase the height rather than the length. These cars proved to be very popular with commuter agencies. By the year 2020, 14 agencies across North America operate fleets totaling almost 1500 BiLevel Commuter Cars!

**For more history on the E-units, check out our Masterclass online at: [rapidotrains.com](https://www.rapidotrains.com)**

### The Rapido BiLevel Commuter Car features:

- 3D designed body shell for unparalleled accuracy
- Single or double cab front windows as appropriate
- Correctly tinted windows
- Accurate painting and lettering
- All-new, smooth rolling inside bearing trucks
- Full pilot detailing with body mounted couplers
- Constant interior lighting in DC and DCC
- Controllable cab car lighting in both DC and DCC
