

### DESTINATION SIGN TEMPLATE

Templates here are provided at 4x actual size to allow making the signs easier. Reduce the final product to 25% actual size (or multiply by 0.25) to get the final size to print and install on your bus.

Some companies produce decal paper which can be used in standard inkjet printers. If you don't plan to have the sign lit, you can also print the signs on regular printer paper and apply to your bus.

A selection of generic rollsign font shapes are provided at the bottom as well.
